Keeping Your Home Pest-Free This Winter!

Dear Valued Customers,

As we embrace the cooler temperatures of November here in Austin, it's essential to prepare for seasonal pests and rodents that may try to invade our homes in Austin and the surrounding areas. At Be Bug Free Services, we're here to help you stay informed and pest-free this winter.

Here's what you need to know! Seasonal Pests to Watch For:

1. Rodents (Mice, Rats, Opossums, Squirrels, Ring Tail Cats and Raccoons):
With colder weather approaching, rodents often seek warmth and food inside our homes. These rodents can squeeze through tiny gaps and create damage to your home. For example electrical wiring, ac duct work and insulation so it's crucial to stay proactive.

2. Boxelder Bugs:

Commonly seen in fall, boxelder bugs may invade your home in search of shelter. While they don't cause damage, they can be a nuisance in large numbers.

3. Asian Lady Beetles:

These beetles are attracted to light and warmth, often entering homes during the fall months. While they are beneficial in the garden, they can stain surfaces if crushed, so it's best to keep them outside.

4. Spiders:

As the weather gets colder, various spider species may try to make their way indoors. Regularly checking corners, windows and doors can help keep them at bay.

Tips for Pest Prevention:

Food Storage: Store food in airtight containers and promptly clean up any crumbs to deter pests.

Declutter: Reducing clutter in your home can eliminate hiding spots and make it less inviting for pests.

Regular Inspections: Stay current with your ongoing maintenance services. If possible, try not to skip services in the winter!

Schedule a FREE Rodent Inspection with us, to catch any potential issues early.

November Special Offer!

This month only, enjoy 10% off any rodent control service! Mention this newsletter when you book your appointment.
