**TERMITE
SEASON**

There's 2 types of homes in Texas:

The ones that have termites & the ones that will get them soon!

Protect Your Home This Termite Season!

Spring is almost here, and with it comes termite season! As temperatures rise, termites become more active, swarming in search of new places to establish colonies. Don't let your home become their next target!

Signs of Termite Activity

- 🔍 **Swarmers (Flying Termites):** Small winged insects near windows or light sources.
- 🔍 **Mud Tubes:** Thin, pencil-sized tunnels on walls or foundations.
- 🔍 **Hollow or Damaged Wood:** Tap on wooden surfaces – if they sound hollow, termites may be inside!
- 🔍 **Discarded Wings:** Piles of tiny, shed wings near doors and windows.

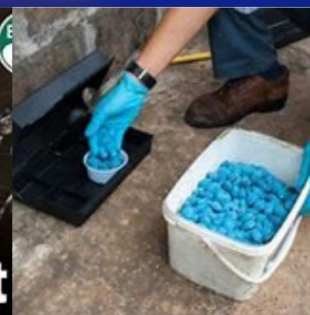

How to Protect Your Home

- ✅ **Schedule a Professional Inspection** – Early detection is key to preventing costly damage.
- ✅ **Eliminate Moisture** – Fix leaks, improve ventilation, and remove wood-to-soil contact.
- ✅ **Seal Entry Points** – Close gaps in foundation, walls, and around pipes.
- ✅ **Consider Preventative Treatments** – Protect your home before termites

RODENT BAITING

Baiting and environmental impact

Selontra®: The Smarter, Faster Rodent Control Solution!"

"A common misconception of Rodent Baiting is that if the rodent has eaten the bait and dies, it can harm other animals that come in contact with it, that is what is great about Selontra bait, that doesn't happen! It only affects the rodent that ate the bait!"

Selontra Rodent Bait is a soft bait formula that delivers fast colony kill of anticoagulant resistant rodents like norway rats, roof rats, and house mice in just seven days. It's shortened bait program requires less bait and it has been formulated with the active ingredient Cholecalciferol, which allows
